DARCY TURIN

GIS Coordinator with a Master of Geomatics in Environmental Management, specializing in spatial data maintenance, quality assurance, and web mapping. Skilled in managing multi-jurisdictional spatial datasets, automating data processing with Python, and building web maps with ArcGIS, StoryMaps, QGIS, and JavaScript. Experienced working in a remote setting and collaborating with First Nations and conservation partners.

EDUCATION

MASTER OF GEOMATICS IN ENVIRONMENTAL MANAGEMENT (MGEM)

University of British Columbia — Aug. 2024 - May 2025

- Coursework in spatial statistics, data analysis, GIS modeling, and data visualization

B.A. INTERNATIONAL RELATIONS, MINOR IN RUSSIAN

University of British Columbia — Sep. 2017 - May 2021

SKILLS

GIS & REMOTE SENSING: ArcGIS Pro | ArcGIS Online & StoryMaps | QGIS | Google Earth Engine | ENVI | eCognition | SQL & PostgreSQL/PostGIS

PROGRAMMING & DATA ANALYSIS: Python | ArcPy | R | Git/Version Control | Excel | JavaScript

CERTIFICATIONS: BC Class 5 Driver's License | Wilderness First Responder | CPR/AED

RELEVANT EXPERIENCE

Emergency Planning Secretariat — Regional/GIS Coordinator

Feb. 2026 - Present

- Support 31 Mainland Coast Salish First Nation communities in emergency preparedness/response and coordinate environmental resilience projects
- Manage and maintain geospatial datasets with emphasis on usability and accurate documentation
- Create interactive and hard-copy maps to support internal operations and public-facing presentations
- Collaborate closely with technical experts, local governments, and Indigenous communities to integrate complex spatial data with traditional knowledge while respecting data governance and sensitivity protocols
- Developed a Google Earth Engine application to analyze 40 years of river dynamics for regional mitigation planning

Stewart, Aulinger & Company — Legal Assistant

Aug. 2023 - Mar. 2024

- Verified parcel and ownership data across BC Assessment, LTSA, and municipal systems to support land development and property transfer projects
- Managed structured records and database tracking systems, maintaining high standards for documentation and version control
- Conducted legal research, filed annual reports, and maintained minute books for over 200 corporations

United States Department of Defense — Geospatial Analysis Intern

Jun. - Aug. 2018; Jun. - Aug. 2019

- Analyzed satellite imagery and multi-source geospatial data to identify patterns and monitor change
- Conducted open-source research to contextualize analytical results
- Produced intelligence summaries, briefings, and visualizations in organization-standard formats to communicate results to decision-makers

PROJECTS

Dine Out Vancouver Interactive Map — **Independent Project**

Jan. 2026 - Present

- Built a clean, structured spatial dataset from publicly available Dine Out Vancouver Festival data by scraping, cleaning, and validating tabular records
- Geocoded restaurant addresses using OpenStreetMap (Nominatim) and Google Geocoding API
- Implemented filtering by price, cuisine, menu type, and Google Maps rating to make the data easier to explore and use
- Designed a fast, mobile-friendly public web map using JavaScript, GeoJSON, and Protomaps vector tiles, demonstrating how GIS, geocoding, and web mapping can transform static data into an intuitive spatial tool
- Project featured in *The Georgia Straight* and *Vancouver Is Awesome*

Applying Declassified Cold War Intelligence Imagery for Long-Term Forest Cover Change Analysis — **UBC MGEM**

Sep. 2024 - Apr. 2025

- Designed and implemented a hybrid remote sensing workflow to classify forest cover using historic panchromatic and modern multispectral imagery in the Pamir Mountains, Tajikistan
- Collaborated with supervisors to conduct data requirements analysis, documentation, and model validation, ensuring accuracy and alignment with project goals
- Created reproducible R, Google Earth Engine, and GIS workflows to apply segmentation and machine-learning classifiers to detect land cover types in challenging mixed terrain
- Quantified forest cover change over 45 years, with implications for environmental monitoring and land use analysis in conflict-affected regions
- Communicated results through visualizations, reports, and presentations for interdisciplinary audiences

ADDITIONAL EXPERIENCE

Vancouver Botanical Gardens Association — **Philanthropy Volunteer**

Mar. - Sep. 2023

- Supported fundraising campaigns by integrating internal tools for data synchronization
- Updated garden maps and donor records for the Adopt-A-Tree program, ensuring accurate and consistent records
- Utilized DonorPerfect CRM software to track contributions and generate reports

Mount Seymour Resort — **Guest Experience Representative**

Dec. 2021 - Apr. 2022

- Provided customer support via email, chat, and in person, clearly communicating policies
- Managed sensitive customer and sales data across multiple platforms with attention to accuracy and confidentiality

Ramah in the Rockies — **Outdoor Leadership Institute Guide**

May - Aug. 2021

- Led backpacking and backcountry trips for high school students in remote areas of the Rockies
- Developed and taught outdoor and Jewish education curricula focused on group dynamics and community building
- Responded effectively to medical, social, and emotional challenges, prioritizing safety and well-being
